These amendments to the application are being made in order to incorporate the amendments that have been made in the parent application, U.S. Patent Application No. 09/662,254. No new matter has been added by this Amendment.

By this Amendment, the applicants have amended the specification to correct an obvious typographical error that appeared on page 5. The applicants have also added appropriate cross-references for the sequences in the Brief Description of the Drawings section and Brief Description of the Sequences section of the specification. Accordingly, upon entry of this Amendment, all sequences found in Figures 10 and 12 are identified by SEQ ID NOs. Support for these amendments can be found within Tables 1-3 and throughout the subject specification and claims as originally filed.

Respectfully submitted,
